New plan looks to replace Israel's solar water heaters with PV cells and heat pumps The Times of Israelsource

The Energy and Infrastructure Ministry unveiled a proposal Wednesday to phase out Israel's ubiquitous rooftop solar water heaters in favor of photovoltaic (PV) panels and heat pumps, a move...

Founded in Germany during 1993 LORENTZ has pioneered, innovated and excelled in the engineering and manufacturing of solar powered water pumping. We design, develop and manufacture the widest ...

Chromagen, a pioneer in the production of solar water solutions since 1962, is the market-leader in Israel, which leads the world in per capita installations. Globally, the company has developed a solid ...

The idea was to effectively pump water using solar panels, enabling farmers to irrigate their 1-2-hectare farms during the "dry season". We planned the system to ensure higher volume of water pumped by ...

Xylem leads the way in the field of electrical and mechanical engineering with expertise in building control and monitoring systems for solar charged remote power units.

This guide explores repair options, common issues, and cost-effective fixes - perfect for farmers, sustainability advocates, and anyone relying on solar-powered systems.

Israel has cut off the electricity supply to Gaza. At the beginning of March 2025 the second-largest desalination plant in Gaza, located in Deir Al-Balah, was running off generators at 30% capacity, but ...
