It is planned in Kabul, Afghanistan. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the financed stage.

According to DABS, the project has been implemented through private sector investment, with construction work beginning in early 2024. The investor company is currently ...

The Naghlo 10 MWdc solar power project, located in the Surobi district of Kabul, Afghanistan, represents a significant milestone in the country's renewable energy sector.

Groups opposed to the Kabul government might target energy infrastructure to disrupt services and erode the Taliban's legitimacy. Protecting these assets will necessitate long-range ...

This environmentally friendly solar plant will provide clean electricity to nearly 23,000 households, contributing to a more sustainable and energy-secure future for Afghanistan.

Following an in-depth deliberation, the initiative put forth by Turkish 77 and Zolaristan companies to generate 22.75 megawatts of solar power in Sarubi district of Kabul province, was ...

Afghanistan is racing against the odds to complete five astonishing megaprojects--from a giant canal turning deserts into farms, to building a futuristic capital city next to Kabul.

For solar manufacturing, this means careful planning is needed to bring in essential materials like silicon, glass, and aluminum, and to get finished panels out to local customers or for ...
