By the end of this year, with the completion of the energy storage station and the coordinated control of the source-grid-load-storage system, Minning will achieve the goal of 24-hour ...

MoC Annex 1 Modalities of Communication valid as of 05/09/2013 MoC Annex 2 (Withdraw Project Participant) valid as of 06/09/2013 Registration Date 23 Aug 12(Date of registration action 23 ...

The project generates 106,032MWh electricity thereby offsetting 107,124t of carbon dioxide emissions (CO₂) a year. The wind power project consists of 33 turbines, each with 1.5MW nameplate capacity.

Inner Mongolia Mengdong Century Concord Kailu Wind Farm is a 49.5MW onshore wind power project. It is located in Inner Mongolia, China. According to GlobalData, who tracks and profiles over 170,000 ...

It is located in Inner Mongolia, China. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in multiple phases. ...

Generalities Wind farm name: Kailu Yihetala II Country: China County / Zone: Inner Mongolia

Its construction is planned in 2010 and completion of all works is anticipated in 2013. Its equivalent usage hour is 2300 and theoretical annual power generation is 700 GWh.

The project is developed and owned by Guohua (Kailu) Wind Power. The project generates 685,200MWh electricity thereby offsetting 692,258t of carbon dioxide emissions (CO₂) a year. The ...
