The Korean company is opening what it says is the first solar panel factory to begin production in the U.S. since the passage of President Joe Biden's signature climate legislation.

The manufacturer is also building a vertically integrated solar supply chain fab in Georgia's Cartersville where it will produce solar ingots, wafers, cells and modules.

South Korean solar panel manufacturer Qcells announced on Wednesday the completion of its third Dalton, Ga., factory expansion, which will bring the facility's total output to more than 5.1 ...

The Qcells Dalton factory is the largest manufacturing plant of its kind in the Western Hemisphere and the first solar panel plant expansion since the passage of the Inflation Reduction Act ...

The company says its new plant is the first solar module factory in the U.S. to begin production since the passage of President Joe Biden's signature climate legislation.

The fully automated factory will bring Qcells' annual module production capacity to 8.4 GW, which is nearly 46,000 panels a day and enough to power 1.3 million homes annually.

Hanwha Solutions Qcells Division (Hanwha Qcells), a global leader in complete clean energy solutions, has finalized the construction of a 3.3 gigawatt (GW) module production line at its ...

Q CELLS invested \$200 million into the new facility, the largest solar manufacturing facility in the Western Hemisphere. With a 300,000 square feet facility and over 600 employees, the ...
