The Kiribati Energy Storage Project is flipping the script, combining solar arrays with massive battery banks to create a hybrid power system. Think of it as giving the islands a giant ...

Specializing in island microgrid solutions since 2010, we've deployed 23 solar-storage projects across the Pacific. Our modular systems withstand harsh marine environments while maintaining 94.7% ...

As climate change threatens low-lying regions like Kiribati, reliable and clean energy infrastructure has become a lifeline. This project, combining solar power and advanced battery storage, addresses both ...

Energy storage battery containers offer a scalable, renewable-driven solution to stabilize grids and reduce carbon footprints. This article explores how these systems work, their benefits for Kiribati, and ...

That's Kiribati's reality - 33 coral atolls facing energy poverty and climate threats simultaneously. With 70% of urban households experiencing daily blackouts during peak hours, the urgency isn't ...

The project encompasses the construction of a solar and battery energy storage system (BESS) minigrid to be built on the island of Buka, within the autonomous region of Bougainville in Papua New Guinea. ...

Looking to address challenges at the local level, the roadmap recommends solar desalination in South Tarawa; a combination of wind power, PV and battery storage for Kiritimati Island; and renewable ...

As we approach Q4 2025, the project's second phase adds 2MW floating solar + hydrogen electrolyzers. Because when your entire country could disappear, you learn to store energy everywhere - even in ...
