What happens if you lease a solar energy system?

If you lease a solar energy system, you are able to use the power it produces, but someone else--a third party--owns the PV system equipment. The consumer then pays to lease the equipment. Solar leases often involve limited upfront investment and fixed monthly payments over a set period of time.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

What is a community and shared solar program?

These programs enable a group of participants to pool their purchasing power to buy solar into a solar system at a level that fits their needs and budget. The system can be on- or off-site and may be owned by utilities, a solar developer, non-profit entities, or multiple community members. Learn more about community and shared solar.

What is a solar lease & PPA?

Solar leases and PPAs allow consumers to host solar energy systems that are owned by solar companies and purchase back the electricity generated. Consumers enter into agreements that allow them to have lower electricity bills without monthly loan payments. In many cases, that means putting no money down to go solar.

In a bid to escape the limitations of her 1950s ranch home, the owner embarked on this eco-venture. The home harnesses solar power to its maximum, ensuring you're comfy even when ...
