What are solar PV end-of-life waste management and recycling regulations?

Table 2. Solar PV end-of-life waste management and recycling regulations in China and the USA. The GB/T 38,785-2020 standard provides technical requirements for recycling thin-film photovoltaic modules and reusing them for building use. Furthermore, China has also established other standards and guidelines for the management of EOL PV waste.

Are there regulations & guidelines for managing solar PV EOL waste?

As of March 2023, various states in the United States have promulgated regulations and guidelines for managing EOL waste from solar photovoltaic (PV) systems. The regulations and guidelines for managing solar PV EOL waste in particular states follow.

Does New York regulate end-of-life waste management of solar photovoltaic (PV) panels?

New York: New York State has regulations governing end-of-life waste management of solar photovoltaic (PV) panels. These regulations are overseen by the New York State Department of Environmental Conservation (NYSDEC).

How much solar panel waste will be disposed of by 2050?

Recent estimates project 78 million metric tons of solar panel waste globally by 2050, making robust disposal regulations crucial for sustainable industry growth.

The regulations surrounding solar panel disposal vary by region, but common standards are emerging to address the growing e-waste challenge. Current regulations often classify solar ...

Latest policy on waste photovoltaic panel disposal Does PV waste have a specific policy? Despite the recognised importance of these measures, current PV regulations in most countries, including the five ...

The rapid expansion of solar photovoltaic (SPV) deployment has created an urgent challenge of managing end-of-life (EoL) panels. Global capacity surpassed the terawatt scale in 2022 ...

The growing challenge of solar panel disposal demands immediate attention as the first generation of photovoltaic installations approaches end-of-life, presenting both environmental risks ...

The Central Pollution Control Board (CPCB) has released draft guidelines on June 4, 2025 for the safe storage, handling and transportation of discarded solar photovoltaic (PV) modules, ...

# Latest policy on waste photovoltaic panel disposal

Source: <https://www.studioogrody.com.pl/Tue-28-Mar-2017-6803.html>

The policy document had to be related to solar photovoltaic end-of-life waste management, including policies and regulations focused on recycling, reuse, and disposal of solar ...

CPCB releases India's first draft guidelines for solar PV waste. Learn about health risks, policy gaps, and solutions under the 2022 e-waste rules.

Solar panel recycling is a multi-step industrial process that separates glass, aluminum, silicon, copper, silver, and polymers from end-of-life photovoltaic modules using mechanical, thermal, ...
