-----

Its compact size allows for rapid deployment, making it an ideal fit for small microgrids, off-grid applications, or regional telecom base stations, providing reliable power without the need for large ...

Hanersun has announced the commissioning of a 1.15MWh commercial energy storage project in the Latvian capital Riga. The project, featuring five units of the company's HNESS 230-L ...

Following its 2025 energy independence, Latvia is experiencing a surge in renewable energy, with solar and wind capacity skyrocketing. With EU funding and local policies supporting storage projects, the ...

The system adopts lithium iron phosphate battery technology, with grid-connected energy storage converter, intelligent control through energy management system (EMS).

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid ...

Atlas Copco has launched its largest container energy storage system (ESS) in the prime power market - the ZBC 1000-1200 - which delivers 1MW of power output and 1.2MWh energy ...

As we approach Q4 2025, industry watchers are keeping tabs on Latvia's first gigafactory for battery cells. When operational, it'll slash import costs by 60% and create 800+ skilled jobs.

Located in Latvia, this project involved a Latvian photovoltaic company purchasing five 20-foot containerized energy storage BESS Container systems. Each system consists of four Solis ...
