Lectron was the first EV charger I ever purchased. It was a low-power Level 2 unit that worked perfectly with an existing 240V outlet in my home's garage. Since that time, I've tested a...

An honest review of the Lectron Portable Electric Car Charger. Is the cable long enough? How fast does it charge? Everything will be explained here.

Welcome to our in-depth Lectron Portable Level 2 Charger (40A) Review, where we evaluate this popular electric vehicle (EV) charger to help you decide if it's the right choice for your ...

Hey everyone - Lectron sent me their portable Level 1 / Level 2 EV charger to review. It lets you charge at 12 amps with a normal 120v outlet or 32 amps with a 240v nema 14-50 outlet.

Lectron Level 1 / Level 2 EV Charger offers flexible Level 1/2 charging, 16-ft cable, safety features, and portability for all J1772 EVs.

The Lectron 40 AMP Portable Charger is one of the most popular level 2 EV chargers from the brand. After reading consistently good user reviews of this product on Amazon, we decided to ...

Best Buy has honest and unbiased customer reviews for Lectron - Portable J1772 Level 2 NEMA 14-50 Electric Vehicle (EV) Charger-up to 40A-16" - Black. Read helpful reviews from our customers.

I'm on the hunt for a portable Level 2 charger and was suggested this dual-level charger from Lectron by a colleague. Has anyone tried this one yet? Looks promising and is faster than EVSEs of the same ...
