Lin-gang Special Area focuses heavily on institutional innovation to build a special economic functional zone that will be more influential and competitive in the global market.

This aims to accelerate the construction of a high-level new power system demonstration area with Lin-gang characteristics and international leadership. The event unveiled plans for Lin-gang's low-energy ...

One of the routes featuring innovation will connect China's largest ultra-low energy consumption building, the Lingang Center, and the Mobius Science Park featuring optimized design using BIPV ...

The Lin-gang Special Area Administration, Fengxian District People's Government, China KangFu, and Tesla sign to co-construct a new grid-forming zero-carbon energy international cooperation ...

This paper introduces the smart campus demonstration project, Shanghai University of Electric Power (Lingang Campus), which is the only "new energy smart microgrid demonstration...

Lin-gang's industrial ecosystem has evolved significantly over the past six years. What was once a stretch of coastal mudflats has transformed into a thriving hub of innovation and industry.

On the morning of March 23rd, the conference for accelerating the industry-education integration (IEI) in Lin-gang Special Area was grandly held at Lin-gang Center.

Since 2018, Lingang has hosted multiple editions of the WLF, growing in tandem with the event itself. Rising on the shore of the East China Sea, Lingang has rapidly evolved into a thriving ...
