This repository contains the design files for a DC uninterruptible power supply well suited to run network appliances like small switches, home routes and WLAN access points.

Design a custom power supply based on one of our AC-DC or DC-DC power supplies to fit your Medical, Industrial, Audio, Video or Communication needs.

A vast catalogue of more than 900 industrialized custom products and more than 280 standard solutions allows us to have perfect control over development and innovation in custom-made projects.

Our dedicated engineering team will work with you through the lifetime of your power solution to ensure maximum value and reliability. We focus on resolving your power supply challenges, so you can ...

In addition to its extensive range of standard products, RECOM offers comprehensive customization options, including full custom, semi-custom, and modified standard designs.

Our services are entirely bespoke--every DC-DC converter we design is tailored to your exact specifications. From PCB size to input/output voltages, rail count to protection features, we ensure ...

A DC-UPS is an uninterruptible power system that takes in primary power (usually utility AC) and outputs DC voltage while providing backup power from the integrated batteries in the event the ...

In this instructable, I would like to share with you the joy (and a little bit of struggle) of designing my own uninterruptible power supply. I will try to present you the whole design process, my thoughts, ...
