Current, comprehensive coverage of the Solar Power Generation Industry. Includes: industry forecasts, trends, financial information & detailed analysis. Updated 11/24/2025.

Within the renewable energy market, solar PV holds about 40%, making it the largest single contributor ahead of wind, hydro, and biomass. In the power generation market, its share is ...

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of solar PV across agriculture and business ...

The demand for solar photovoltaic (PV) will rise because of recent technology developments and research & development operations for efficient power generation across large ...

Across all regions, developing a skilled workforce and setting ambitious solar and storage targets are essential tasks. In these times of political uncertainty, low-cost solar power could turn into ...

The solar PV market in the North America is expected to grow significantly over the forecast period, owing to its rapidly expanding solar energy landscape driven by favorable government policies, ...

Growth in the North American solar PV market is being driven by falling system costs and growing customer awareness of the financial and environmental advantages of solar energy.

Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U.S. ...
