We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

Summary: Discover how customized lithium battery solutions are transforming energy storage in the Maldives. From solar integration to marine applications, learn why tailored lithium-ion systems are ...

The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking a significant step forward in ...

Project Scope: Design, supply, and installation of 6 MWh Flow Battery Energy Storage Systems (BESS) and Energy Management Systems (EMS) on two outer islands of the Maldives. The ...

The project tapped the JFJCM to finance and pilot test an advanced battery energy storage system, including an energy management system, that can help address the additional ...

Maldives is seeking input on flow battery-based energy storage systems for two of the country's 1,192 islands.

The Ministry of Environment, Climate Change and Technology has signed a contract for the installation of 40 MWh capacity Battery Energy Storage Systems across 24 islands in the Maldives.

The Maldivian government has signed a landmark agreement to deploy 38 megawatt-hours (MWh) of battery energy storage systems (BESS) alongside energy management systems ...
