The Microgrid Systems Laboratory is a collaborative effort to speed the transition to a more resilient, sustainable, and equitable electricity system. Microgrids are community-scaled smart energy ...

The lab enables researchers to test fully functioning microgrids ...

NLR is collaborating with the San Diego Gas & Electric Co. to model a microgrid in Borrego Springs, California, and evaluate how a microgrid controller with advanced functionality ...

Our data-driven approach models demand and generation to derive the right balance of load, generation, and energy storage, aiming to minimize capital and operating costs. We provide support ...

Covers both AC and DC microgrid architectures: The lab supports AC microgrids, DC microgrids, and hybrid AC-DC microgrids, enabling learners to study advantages, limitations, and power-flow ...

The lab enables researchers to test fully functioning microgrids under real-world conditions, allowing Schneider to more quickly design and deliver microgrids for its customers.

The Smart Microgrid and Renewable Technology (SMRT) lab is a power converter based microgrid testbed. The facility consists of four types of subsystems, i.e., two real-time simulators (RTS), two ...

Schneider Electric held a ribbon-cutting ceremony for a data center and microgrid laboratory at its global research and development center in Andover, Mass., the company ...
