MESA-DER has become IEEE 1815.2! The Modular Energy System Architecture (MESA) Standards Alliance is an industry association of electric utilities and technology suppliers.

Recent developments in modular energy technology include scalable and versatile energy modules that can be easily integrated into existing systems. These solutions feature ...

The Modular Energy Storage Architecture (MESA) Standards Alliance is an industry trade association of utilities and vendors whose mission is to accelerate the growth of the energy storage industry ...

MESA publishes open, non-proprietary specifications and information models that enable utilities, software developers, and hardware manufacturers to achieve interoperability among grid-scale ...

MESA Standards clear barriers to growth in energy storage. By enabling standardization in connections between components, MESA allows utilities and vendors to focus on delivering more cost-effective ...

Modular energy systems are energy frameworks that consist of interchangeable and scalable components, allowing for the customization and optimization of energy sources, ...

The MESA-DER specification (version 1 released December 2018) defines the communication requirements for distributed energy resources (DER), with a special focus on utility-scale energy ...

A Modular Energy Storage System is a sophisticated power solution built from standardized, self-contained units, or "modules." Each ...
