What are energy storage cabinets?

Designed to seamlessly integrate with your existing power infrastructure, these cabinets offer efficient energy storage in a compact, robust form factor. They are ideal for facilities requiring a clean and organised power management system while maintaining high energy capacity and reliability.

How can modular buildings improve sustainability?

Sustainability through VMC is achieved by optimising material consumption, reducing and recycling of waste, additionally modular buildings are able to be deconstructed and reconfigured or relocated and extend their lifespan and contribute to the circular economy.

Why should you choose Powerplus cabinets?

There are enclosures to suit outdoor or indoor installations. Strong steel cabinets with a high quality powder coating finish promote durability and security whilst being well-suited to protected environments like garages, sheds and other enclosed spaces. Like to choose Australian made? Rely on PowerPlus cabinets to protect your next system.

What are pre-wired cabinets?

Our pre-wired cabinets minimise the time required to install batteries and inverter equipment on-site. Ranging from small battery enclosures to cabinets, including gear trays you can pre-build and test in the workshop, simplifying site installation. Suitable for protected environments, our Rack cabinets make the most of the available floor space.
