To build a smart PV+ storage system in order to increase energy reliability in Nepal whilst reducing the environmental impact, we collaborated with four organizations for our project- GRIPS.

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

Using NREL's power system planning and operational models of South Asia, these analyses identify potential storage applications and growth opportunities under various cost, policy, and demand ...

The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load ...

Located in the Dedza district of Malawi near the town of Golomoti, the 20MWac solar PV and 5MW/10MWh energy storage project is set to become a leading project in sub-Saharan Africa in ...

Solar with battery storage presents a timely and strategic upgrade for Nepal's renewable energy sector.

The new energy independent power supply system, solar power system, provides an economical, feasible and reliable power supply solution for remote communication base stations.

This pioneering project is set to transform industrial energy use by replacing polluting diesel generators with a large-scale battery storage system powered by solar energy.
