Laminar Water delivers a complete, containerized water treatment plant inside a secure shipping container to solve your water quality challenges in a fraction of the time of a brick-and-mortar facility.

LZY Solar Containers use proprietary folding panel technology to maximize power generation while maintaining standard shipping dimensions. Our systems are faster to deploy, generate more power ...

In modern society where water resources are scarce, this type of mobile water treatment equipment, with its portability and flexibility, has greatly solved the problem of water shortage or ...

While traditional stationary solar power systems are normally cumbersome to install and difficult to relocate, folding PV containers make use of innovative articulated panels and a hydraulic ...

Besides meeting the demand of energy in different scenarios, this container will enable optimized utilization of resources by introducing module design and a powerful electricity generation system.

A "multi-barrier" approach is used, involving a series of physical and chemical treatment steps that remove undesirable substances such as colour, suspended particles, algae, bacteria, and viruses ...

We have constructed many different custom-made water treatment plants in container adapted to specific demands and wishes. Please contact us for further information and to hear about your options.

Because solar adoption at wastewater treatment plants is still relatively new, there is little known about these facilities, including where they are, what drove them to choose solar, and if solar ...
