The photovoltaic seismic bracket forming machine is mainly composed of an uncoiler, a leveling machine, a servo feeding machine, a punching machine, a punching device, a roll forming machine, ...

Our company has more than 40 large and small punch machines (63-315 tons) equipment, 4 sets of automatic punch equipment, the company covers an area of 2788 square meters, the total number of ...

Looking for reliable and durable solar panel mounting solutions? Our hot-dip galvanized steel photovoltaic bracket punching anti-seismic pipe gallery bracket channel steel is the ideal choice. As a ...

This antidetonation braced system structural design is reasonable, uses in groups, can effectively reduce the damage that vibrations caused the solar photovoltaic board, has reduced economic...

The photovoltaic seismic bracket forming machine is an automatic rolling forming production line specially designed and manufactured for building electromechanical engineering. The raw materials ...

Areas with high seismic activity, such as along fault lines or in regions prone to earthquakes, require PV brackets to be designed and installed to withstand greater seismic forces.

Has a very good anti-corrosion properties, long life expectancy, life expectancy much longer than ordinary bridge, the production of a high degree of industrialization, quality and stability.

We are a physical factory specializing in the production of photovoltaic brackets, earthquake-resistant brackets, cable brackets, and punched C-shaped steel....
