PV laminates, Solar Films and PV Backsheet solutions for the photovoltaic industry.

Our front sheet ETFE film provides high levels of resistance to chemicals and weathering as well as low flammability, stress crack resistance, and insulating properties in solar photovoltaic panels.

Enhance your solar energy solutions with CloudFilm's Photovoltaic Backsheet Film, providing you with superior protection and efficiency.

A high-performing laminating adhesive enhances film bonding for exceptional strength and durability. Our constructions have been proven industry performers - meeting strict IEC and UL requirements. If ...

High tack adhesive film protects photovoltaic module glass, aluminum, and various metals from damages. Use our residue-free film tape during shipping, handling, and production line processes.

This article will guide you through the process of repairing cracked solar panels, focusing on two primary methods: covering the panel with laminating film and applying polyurethane.

There is EVA (plastic) film underneath that cracked glass (between glass and solar cells), so in some cases cracked panels can tolerate moisture long time even if you don't repair them at all.

SOLAR-TDB(TM) is a single ply of SG7115/SG7135 melt-encapsulation sheet to provide good thermal dissipative capability and more than 1500V insulation. It replaces both T/P/T and EVA in traditional ...
