Industrial landscapes are shifting, particularly in regions historically dependent on coal mining. In a pioneering move, Peabody Energy and RWE will convert abandoned mine lands across ...

Several new forms of photovoltaic (PV) installations have been proposed for advancing the deployment of solar energy while mitigating land-use conflicts. One prominent approach is ...

An innovative approach gaining traction is the conversion of decommissioned coal mines into solar energy farms. This strategy not only addresses the challenges of land availability for ...

The Nature Conservancy and the Cumberland Forest Limited Partnership have announced new agreements with Sun Tribe Development and ENGIE to develop 14 solar energy ...

The analysis relies on data from GEM's Global Coal Mine Tracker, identifying open-pit coal mines across the globe that have ceased operations or are set to close soon.

In a landmark report released this month, Global Energy Monitor reveals that converting recently closed and soon-to-be-retired coal mines into solar farms could boost global solar capacity by...

17 former coal mines in the US are being transformed into clean energy hubs, featuring 14 solar farms and three battery storage sites.

Consisting of 14 solar PV plants and three battery storage projects that will be built on 360 acres of former coal mines in the US states of Virginia, Tennessee and Kentucky. The portfolio...
