iso has rapid development in the photovoltaic (PV) industry. Since 2014, the Chinese government has begun to implement the PV power generation for poverty alleviation, which not only was in line with ...

As a new type of PAPSE project, agrophotovoltaics (APV) has the potential to address the limitations of PAPSE ones. APV programs that install solar panels above fishponds or over agriculture, flowers, ...

The photovoltaic poverty alleviation project, part of the "Ten Major Precise Poverty Alleviation Projects" implemented by the Poverty Alleviation Office of the State Council, significantly ...

Energy poverty is a serious problem worldwide and has attracted the attention of policymakers. As a type of social welfare project, photovoltaic poverty alleviation projects (PPAPs) ...

To address this problem, we take China's Photovoltaic Poverty Alleviation Project (PPAP) as an example to empirically study the benefits of large-scale PV deployment for alleviating poverty ...

This paper main objective is to evaluate the dynamics of global research on the use of photovoltaic projects for poverty alleviation (PVPA) from 2003 to 2022. We use a bibliometric ...

Here, we present a comprehensive assessment of the emission-reducing and income-increasing effects of the PVPA policy using estimated carbon emission factors and a staggered ...

The research highlights the role of solar PV in alleviating poverty and advancing the SDGs, offering valuable insights to decision-makers seeking to leverage solar energy for sustainable ...
