What are photovoltaic support structures?

The support structures are the elements that allow the fixing of the modules on the roofs where the photovoltaic installation must be housed, constituting a main element of the solution. Circutor offers a complete range of configurable support structures for any type of installation and roof.

What is a solar mounting system directory?

A global solar mounting system directory with advanced filters that lets you review and compare mounting systems. Pictures, data sheets, PDFs and certifications are shown.

Can a solar system be fixed with ground screws?

The system can be fixed with ground screws according to the specified parameters. Our experts carry out the design, numerical modelling and physical testing of components and complete systems for mounting solar panels. We offer customized solutions tailored to our customers' needs.

What types of support structures does circular offer?

Circutor offers a complete range of configurable support structures for any type of installation and roof. The pre-assembled triangle is the main element to create the supports with overhang or flat roof. It is delivered with pre-assembled and mechanised parts to modify their angle of inclination.

A global solar mounting system directory with advanced filters that lets you review and compare mounting systems. Pictures, data sheets, PDFs and certifications are shown.

The invention discloses an arch-supported flexible photovoltaic support structure, and a flexible photovoltaic support system comprises: the foundation structure is used as a supporting ...

The support structures are the elements that allow the fixing of the modules on the roofs where the photovoltaic installation must be housed, constituting a main element of the solution. ...

Our goal is to offer you high quality scaffolding solutions that meet the highest safety standards. By using high-quality materials and professional assembly methods, we ensure a stable and safe working ...

Economic and Environmental Benefits Investing in proper scaffolding techniques for solar panel installations not only improves worker safety but also has broader economic and environmental ...

Photovoltaic fixed support scaffolding specifications

Why Proper Steel Specs Make or Break Solar Projects Did you know that 68% of solar farm delays in Q4 2024 were traced back to incorrect steel support specifications? With global PV installations ...

As solar panels are becoming more and more popular around the world, more and more businesses are looking to take advantage of them. The metal structures offered by us are ideal for ...

5 columns fixed photovoltaic support, the typical permanent load of the PV support is 4679.4 N, the wind load being 1.05 kN/m², the snow load being 0.89 kN/m² and the seismic load is ...
