How much does a solar panel installation cost?

Cost Per Kilowatt Installed Solar panel installation costs vary significantly based on location, system size, and quality. Here are 2025 average costs across major markets: Example: A typical 6 kW residential system costs between \$15,000 and \$36,000 before incentives, depending on your location and chosen components.

How much does a 6 kW solar system cost?

Here are 2025 average costs across major markets: Example: A typical 6 kW residential system costs between \$15,000 and \$36,000 before incentives, depending on your location and chosen components. Your final installation price depends on several critical elements: Panel Technology:

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. $\text{Net cost of the system} / \text{lifetime output} = \text{cost per kilowatt hour}$

How much does a solar system cost?

A fully installed solar system typically costs \$2.50 to \$3.50 per watt before factoring in incentives like the 30% tax credit. Using this measurement, a 6,000-watt solar system (6 kW) would have a gross cost between \$15,000 and \$21,000. The price per watt for larger and relatively straightforward projects are often within the \$2.50 to \$3 range.
