What is China's solar photovoltaic exports?

Data updated on a monthly basis. The IEA has stated that China's solar photovoltaic exports account for 80% of the global market. While there is a wide variety of products that make up the solar supply chain, panels, cells and wafers make up the majority of exports by trade value, and can be expressed in GW terms.

Which country exports the most solar PV?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

Will China continue to export photovoltaic products in 2023?

The value of photovoltaic products exported by China hit a record in the first 10 months of 2023, with industry experts saying the momentum will persist through the year, buoyed by higher demand amid a green energy transition worldwide.

Did China Export more solar cells in the first 10 months?

According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022. While the value of solar product exports from China was flat in the third quarter, volumes rose month-on-month, thanks to lower module prices, he said.

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis.

The value of photovoltaic products exported by China hit a record in the first 10 months of 2023, with industry experts saying the momentum will persist through the year, buoyed by higher ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Ember Energy says China's solar export market is shifting as more diverse global supply chains drive higher cell and wafer shipments, lifting combined solar product capacity 11% this year ...

Over the same time period, the price of solar panels exported from China has fallen by \$0.20/W, from \$0.29/W to \$0.09/W.

InfoLink's customs data shows that China exported about 23.38 GW of PV modules in March 2025, up 44% MoM but down 5% YoY from 24.51 GW. China's total module exports reached ...

China's solar cell exports grew by 1.7% year-on-year in the first eight months of 2024, reaching 481.12 billion yuan (about \$66.91 billion), according to data from the General Administration ...

China exported 235.93 GW of PV modules in 2024, up 13% from 207.99 GW in 2023, according to customs data from PV InfoLink. Global module shipments increased 13% year on year, ...
