Industry leaders warn that hybridising PV with batteries is now essential to secure revenue, manage volatility, and maintain investor value. In the wake of Russia's invasion of Ukraine,...

A new report from Wood Mackenzie identifies five key trends that will define the energy storage industry in 2026, including supply chain restructuring and the rise of non-lithium batteries.

Shanghai SETN Electric has undergone continuous innovation research and technological improvement in key technology research and development of box-type substations, high-voltage, medium-voltage, ...

The National Renewable Energy Laboratory (NREL), Sandia National Laboratories (SNL), SunSpec Alliance, and Roger Hill were supported by the U.S. Department of Energy (DOE) Solar Energy ...

After solar energy arrays are installed, they must undergo operations and maintenance (O& M) to function properly and meet energy production targets over the lifecycle of the solar system and ...

Global solar capacity grew 23% year-over-year in 2023, yet photovoltaic power station support installation and construction face unprecedented challenges. With 72% of energy companies ...

The photovoltaic power station construction industry is pivotal in today's quest for sustainable energy. Companies operating in this sector design, build, and maintain solar power facilities, catering to a ...

In 2024, newly-added solar PV installations in China surged 28.3 percent year on year to hit 277.57 GW -- ranking first worldwide, the roadmap revealed. In the case of polysilicon, the ...
