Our precision-coated, structured 3M Solar Films help increase module power, provide moisture protection, and improve the aesthetic of the module. Help speed up assemblies, and improve the ...

New solar panels often arrive with protective film--but should it stay on? This comprehensive guide explains the crucial difference between factory shipping films (which must be ...

Norgard Film has become increasingly popular in solar photovoltaic applications as a transparent and insulative material for encapsulating and protecting solar cells.

A solar panel protective film is a critical component in photovoltaic systems, designed to shield the panel surface from environmental damage, mechanical impact, and degradation from UV radiation.

Photovoltaic backsheet film is a crucial protective layer for solar panels, enhancing their durability and efficiency, safeguarding against environmental damage, and boosting energy conversion efficiency.

The plastic film adhered to solar light cells is primarily a protective layer, crucial for shielding the delicate photovoltaic material from environmental damage, such as moisture, UV ...

Transparent Tedlar® films have been used for decades in protecting graphics and signage and photovoltaic backsheets.

Get custom cut tapes from LAMATEK(TM) for solar panel frame bonding, junction boxes, and edge protection. Separator pads and surface protection films available.
