---

Custom size, unpunched Gusset Plates are used in conjunction with X-bracing in load-bearing shear wall assemblies to resist racking under wind and seismic loads.

The waterproof pressure plate is a specialized accessory used in photovoltaic systems to secure solar modules while providing effective waterproofing. It is primarily applied in metal roof photovoltaic ...

Through its special design and material, it effectively prevents water intrusion and protects photovoltaic panels and the electronic equipment behind them. Some waterproof pressure plates are also ...

Our weldable solar mount provides a secure, fully waterproof attachment for photovoltaic panels on TPO and PVC roofs. This non-penetrating solution thermally fuses to the membrane, ensuring superior ...

Gusset plates come in various forms, each tailored to specific structural needs and applications. Understanding the different types of gusset plates is essential for selecting the appropriate one for a ...

Since gusset plate connections are made either to the column flange or web and to the beam flange for diagonal bracing, and a large range in the bay width to story height ratio is possible, a wide variation in ...

Our product portfolio of watertight solar mounting solutions includes complete systems & attachments for every type of roof. Our patented watertight technology completely seals the penetration point.

Handles extreme temps (-22°F to 140°F), 42A/600V power, and features UL-certified 10AWG wiring. Easy tool-free installation for solar & outdoor power systems.
