How to make a solar panel portable?

Upper + Lower stand: Take any solar panel with an aluminum frame on it, and make it portable. These portable solar panel stands act as legs and work perfectly with a framed solar panel 100 watts or larger. By using the upper legs you'll be able to finely adjust the solar panel to any angle to maximize solar production for any time of the year.

Are solar panel leg brackets UV resistant?

These solar panel leg brackets are made with UV-resistant high-density ASA polymer that works well in extreme temperatures, both hot and cold. It is designed to last outside for decades without degradation and weakening due to the sun.

Do solar panel leg brackets work on concrete?

A single set per panel works very well on concrete, asphalt, gravel, or hard surfaces where there would be no shade issues. These solar panel leg brackets are made with UV-resistant high-density ASA polymer that works well in extreme temperatures, both hot and cold.

58-inch adjustable solar panel tilt mount brackets help you maximize solar energy capture by adjusting the angle of your solar panels throughout the year.
