On July 4, 2025, while the USA celebrated Independence Day, the Czech Republic experienced a major power outage that affected millions in the capital city of Prague and several parts of the country.

Power has been fully restored across the Czech Republic following a widespread blackout that disrupted electricity supplies to Prague, parts of eastern Bohemia, and several northern and ...

PRAGUE - The Czech grid operator said power was slowly being restored on Friday afternoon after a major blackout brought widespread disruption across the country.

Public transport has been disrupted after a blackout cut electricity in large parts of the country, including Prague. Large parts of the Czech Republic were left without electricity on Friday...

The power outage, which began unexpectedly, left large sections of the city without electricity for several hours, prompting immediate responses from local authorities and energy ...

(Bloomberg) -- The Czech Republic is recovering from widespread power outages that halted public transport and businesses in several parts of the country after a fault on the transmission ...

The outage was caused by a fallen power line near Ledvice, not cyberattack or sabotage. Power and transport services have been mostly restored by July 5 after emergency repairs.

The CEPS power grid operator acknowledged problems in northern and eastern Czech Republic. Most trams on the right bank of the Vltava River in Prague were halted, while the left bank ...
