Explore the latest U.S. solar policy changes in Sept 2025, from ITC rules to tariffs and state programs. See how they impact solar developers and markets.

The Senate's 2025 budget bill removes the solar excise tax but keeps the 30% residential ITC set to expire this year. Explore what's changed, what incentives remain, and what homeowners and ...

Significant changes to tax credits could directly impact the financial planning and operational strategies of the solar and renewable energy industries. The new legislation introduces...

The amendment would still require other solar and wind energy projects to be placed in service by the end of 2027.

Explore key U.S. solar policy changes from May 2024, including state-level reforms, federal shifts, and trade updates impacting the industry.

July 4 Update: President Trump signed the "One Big Beautiful Bill" (OB BB) into law, which terminates the 25D solar tax credit at the end of 2025. Homeowner-owned solar systems will need to ...

But while those in the solar power industry are cautiously optimistic about its future, there are still ways the Trump administration could undermine the Solar for All program.

The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of residential and utility-scale solar while undermining the ...
