How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!

What is Qatar's Solar Energy Future?

Qatar's solar energy future is steadily developing. With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country.

How to develop solar power in Qatar?

Currently, efforts have focused on developing solar capacity in the country through research centers, universities, utilities and pilot projects, and a number of institutions including Kahramaa, Qatar Foundation, QNFSP and QSTP are actively working on this front.

Is Qatar a good country for solar power?

With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country. Qatar's global horizontal irradiance is 2,140 kWh per m² per year which makes it well-suited for solar photovoltaic (PV) systems.
