---

A novel solar desalination system and experimental studies to the performance are presented in this paper.

Qichao Hu believes he's on the cusp of one of the most highly anticipated developments in industry: the next battery revolution. As founder and CEO of SolidEnergy Systems, a startup based in Woburn, ...

View Qichao Hu's profile on LinkedIn, a professional community of 1 billion members.

Dr. Qichao Hu (Ph.D.) is the founder and CEO of SES AI, a global leader in Lithium Metal (Li-Metal) battery technology that is bringing the next generation of high energy density battery ...

A public charity, IEEE is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity. © Copyright 2025 IEEE - All rights reserved, including rights ...

Hu Qichao, who was studying for a PhD in applied physics at Harvard University at the time, focused his attention on applied research in battery technology. Hu Qichao, who is dedicated to applying ...

Hu Qichao: Regarding business layout, we have noticed two trends: first, lithium metal batteries will gradually replace lithium-ion batteries and become a new battery material option; second, AI ...

Water evaporation is efficient due to airflow but cooling to chimney needs improvement. A novel solar desalination system and experimental studies to the performance are presented in this ...
