Does Ryobi manufacture 18 volt batteries?

Ryobi manufactures three varieties of 18-volt battery packs for its tools. Ryobi's One+ line of tools includes more than 40 tools that are powered by 18-volt battery packs. Ryobi's 18-volt batteries aren't just for use in tools.

What tools are compatible with Ryobi 18V one+ batteries?

Each of the two 5.0 Ah batteries included is seamlessly compatible with all Ryobi 18V One+ tools including Ryobi 18V One+ drills, trimmers, edgers, jigsaws, reciprocating saws, sanders, vacuum cleaners, LED work lights and more. Moreover, both batteries will charge on any Ryobi 18V one+ charger you may have.

Does Ryobi use lithium ion batteries?

The voltage sensing circuit is not set up for Lithium-Ion batteries. Ryobi started the production of power tools in 1968. Over that time they have made great inroads into the cordless power tool market for the home handyman. Their 18v range started with the humble NiCad batteries. These were very susceptible to the memory effect.

Are Ryobi batteries compatible with all cordless tools?

This chart shows you how compatible the Ryobi 18v One+ range of batteries is with all of their cordless tools. I have included the 1st generation NiCad batteries in case some of you still have them. They will work in all Ryobi power tools but with limited run time and lower power. Note: These are from my own thoughts and real life experience only.

6.0Ah 18V Battery P108 One Plus For RYOBI 18 Volt High Capacity Lithium-Ion New

Wide Compatibility Designed for Ryobi 18V tools, this combo works with a variety of models--including BPL-1815, BPL-1820, P102, P103, P104, P105, and more--ensuring seamless ...

About this item Battery Type: Li-Ion, Voltage: 18V, Capacity: 3000mAh, Quantity: 2 Pack Replacement for Ryobi Batteries Compatible with P102, P103, P104, P105, P107, P108, P109 Ryobi ...

Compatibility: Replacement for ryobi lithium 18v battery, compatible with ryobi battery P108 P102 P105 P104 P107 P103 P109 P122, compatible with ryobi battery charger, say goodbye to power-draining ...

18V ONE+ Lithium Lithium-ion battery technology is introduced to deliver more power, longer runtime, faster charging, all in a more compact design -- while remaining fully compatible with the ONE+ ...
