How will PG& E's infrastructure projects impact San Jose?

The improvements include rebuilding a key substation and making several transmission interconnection and capacity enhancements that will position San Jose for continued growth and innovation. "PG& E's infrastructure projects will have a far-reaching impact beyond the net zero community.

Should San Jose buy more power?

In San Jose, city energy officials say they are reluctant to procure additional power until they know which projects will actually be built. "We do not want to buy more power than we need," said panelist Lori Mitchell, director of San Jose Clean Energy, the city's publicly-owned electricity provider. "That's job No. 1."

Could AI triple San Jose's energy use?

Data centers for AI could nearly triple San Jose's energy use. Who foots the bill? Servers stacked in the Edgecloud Link data center in Mountain View on July 28, 2025. Photo by Aric Crabb, Bay Area News Group
Artificial intelligence and its growing demand for data centers are putting new pressure on California's electric grid.

How much battery storage will California have in 2025?

From 2018 through mid- 2025, battery storage capacity in California increased from 500 megawatts (MW) to more than 16,900 MW. The state projects 52,000 MW of battery storage will be needed by 2045. This dashboard presents statewide data for residential, commercial, and utility-scale installations as of July 31, 2025.
