Is Saudi Arabia preparing for a 2gw/8gwh battery storage tender?

Saudi Arabia's government entity tasked with procuring electricity generation projects has commenced the qualification process for a 2GW/8GWh battery storage tender. Saudi Power Procurement Company (SPPC), licensed as the sole buyer of electrical energy and capacity from sources within the Kingdom, made the announcement on Monday (4 November).

Who is Saudi power procurement Company (SPPC)?

Saudi Power Procurement Company (SPPC), licensed as the sole buyer of electrical energy and capacity from sources within the Kingdom, made the announcement on Monday (4 November). SPPC is soliciting bids for the development of four battery energy storage system (BESS) projects, each with 500MW output and 2,000MWh storage capacity.

How much energy will Saudi Arabia spend in 2021?

According to energy minister Prince Abdulaziz bin Abdullah Al Saud, speaking in 2021, the government is expected to spend around US\$293 billion on power and energy projects by that time. The biggest share will be spent on transmission upgrades and renewable energy, with a smaller investment in the distribution network.

Can Saudi Arabia reach a 50% goal with a Bess procurement programme?

SPPC said on Monday that the newly launched BESS procurement programme will enable Saudi Arabia to reach that 50% goal, with the current tender representing the first tranche of solicitations. The locations for the four BESS facilities, dubbed independent storage projects (ISPs) by SPPC, have been decided.

Saudi storage projects are priced between USD 73/kWh & USD 75/kWh, compared to global average of USD 165/kWh in 2024, lowering battery storage costs outside China.

SPPC is soliciting bids for the development of four battery energy storage system (BESS) projects, each with 500MW output and 2,000MWh storage capacity.

Average container energy storage price per 150MW in Saudi Arabia 4 & #0183; Saudi Arabia has taken a significant step toward revolutionizing its renewable energy sector, announcing the prequalification of ...

Standardized plug-and-play designs have reduced installation costs from \$80/kWh to \$45/kWh since 2023. Smart integration features now allow multiple containers to operate as coordinated virtual ...
