Saudi Arabia is making significant progress in renewable energy, especially in solar power, as part of its Vision 2030. The Kingdom aims for 50% of its electricity to come from renewable ...

Saudi Arabia is a world leader when it comes to extracting energy sources from the ground, but it is the Kingdom's drive to harness a power supply in the sky that is attracting attention.

Al Shuaibah 2 is Saudi Arabia's largest solar farm, with a capacity of more than 2 gigawatts, enough to power around 350,000 homes. But it won't keep its crown for long. Even larger...

A group of researchers from Saudi Arabia's King Abdullah Petroleum Studies and Research Center (KAPSARC) has outlined a potential pathway for the kingdom to achieve net-zero ...

The collaboration is set to develop a massive 2.8 gigawatt (GW) solar power project in Saudi Arabia's Eastern Province, complete with an integrated battery energy storage system.

Inaugurated in 2021, the Sakaka Solar Power Plant in Al Jouf is the first of its kind under the Custodian of the Two Holy Mosques Renewable Energy Initiative, led by the Ministry of Energy.

The main technologies Saudi Arabia employs are photovoltaic and concentrated solar power. Of these two, photovoltaic (PV) systems are the most commonly applied throughout Saudi Arabia.

OverviewTypes of solar powerSolar projectsHistoryGovernment policyPublic responseFutureThe main technologies Saudi Arabia employs are photovoltaic and concentrated solar power. Of these two, photovoltaic (PV) systems are the most commonly applied throughout Saudi Arabia. They produce clean electricity by converting solar energy through semiconductor materials. Between different PV systems, research shows that sun-tracking systems such as the 1-axis tracking system and the 2-axis tracking system produce the greatest amount of energy compared to fixed systems. They increas...
