Leveraging our fully-integrated design philosophy and a proprietary self-learning energy management system, the SCL Series brings solar lighting to a large number of commercial lighting applications ...

Photo Credit: Seattle City Light This guide is designed to provide Seattle City Light customers with information on grid-connected solar electric systems. It provides a background on solar electric ...

The photovoltaic modules between 5W and 20W are a solution for small devices that need a low power supply, such as traffic signals or low power lighting systems, among others. Thanks to its ...

Seattle City Light partnered with Seattle Parks and Recreation to install a solar-powered microgrid with battery energy storage at Miller Community Center, located in the Capitol Hill ...

Powered by solar energy, the LED SCL2 combines cutting-edge solar and battery technologies with robust construction to deliver exceptional performance and reliability.

With a solar electric system, you pay less for electricity from Seattle City Light. If your system produces more electricity than you need at any given time, it will supply the grid, spinning ...

Light on at dusk, Light off at dawn auto. 12 hours lighting time per day, 2 rainy days backup.

Solar photovoltaic systems can displace a portion of the utility power used to meet home electricity needs. They may be operated independently (off grid) or be interconnected to the grid.
