-----

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Shine Green Energy actively supports China's national goals for clean energy and carbon reduction by expanding its operations in the wind and solar PV power generation sectors.

Shuhe is a 270MW hydro power project. It is located on Han river/basin in Shaanxi, China. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently ...

By combining the design, construction and operation technology of solar power plants with the global project development and equipment manufacturing capabilities, and adopting the ...

Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, simultaneously generating ...

It is the second-phase project for an ultra-high-voltage power line that transmits electricity from Qinghai to central China's Henan Province, according to China Three Gorges ...

High on the Tibetan Plateau in western China's Qinghai province, a sea of solar panels stretches out across 345 sq. kilometers, making it the world's largest photovoltaic power park.

On 16 August, the 50 MW tower CSP plant in Gonghe, operated by the Hainan Regional O& M Center of PowerChina New Energy, generated 1.0133 GWh in a single day--the highest daily output since the ...
