Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

The LunaVault is a pre-assembled microgrid solution that incorporates a solar array, battery storage, and inverters. The system offers energy storage solutions of up to 240kWh per 20-foot shipping ...

Off-Grid Solar Containers transforms 20-foot shipping containers into complete, turnkey electricity generators--engineered for the places where conventional infrastructure can't reach, and built for ...

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

This ambitious endeavor transforms a standard 20-foot shipping container into a high-capacity, modular, and off-grid power system capable of supporting diverse energy needs.

This 20ft collapsible container solution features 60kW solar capacity and 215kWh battery storage. Built with robust 480W modules, it powers extended off-grid missions, from microgrids to rural factories, ...

Cool-Watt® is a solar power plant designed as a 20 feet maritime container, pre-cabled and pre-tested so that it can be deployed in less than 1 hour without civil engineering or specialists.

Smart battery management systems increase solar storage density, enhancing container efficiency, and energy output for solar projects.
