Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be deployed in a shared pilot with nine utilities and independent ...

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center (SolarTac) in ...

In a major boost to the growing sodium-ion battery sector, Peak Energy has signed a multi-year agreement with Jupiter Power LLC for the supply of up to 4.75 GWh of advanced sodium ...

It is reported that this flagship project was jointly developed by Moonwatt, IPKW, and Veolia, marking the first practical deployment of a sodium-ion battery energy storage system ...

Moonwatt launches Europe's first sodium-ion energy storage project in the Netherlands. The modular NFPP system marks a commercial milestone for alternative battery tech.

Peak Energy announced the launch and shipment of its sodium-ion battery energy storage system (ESS). The solution delivers a patent-pending passive cooling design to dramatically reduce...

Under its agreement with Texas-based energy provider Jupiter Power, Peak Energy will provide 4.75 gigawatt-hours of sodium-ion battery energy storage systems (ESS) for deployment...

From ESS News Amsterdam-based Moonwatt has developed a new type of battery storage system based on sodium-ion NFPP chemistry, purpose-built for seamless solar hybridization.
