What is Samson Solar Energy Center?

Samson Solar Energy Center is a ground-mounted solar project which is planned over 18,000 acres. The project is expected to supply enough clean energy to power 300,000 households. The project construction is expected to commence from 2020. Subsequent to that it will enter into commercial operation by May 2022.

Who is Samson Solar Energy LLC?

Samson Solar Energy LLC (Samson Solar Energy) develops, finances, builds, owns and operates power infrastructure assets. The company generates energy using the natural gas, solar sources. The company is located in United States.

Who will be power offtakers from Samson Solar Energy Center?

American Honda Motor, AT& T, Bryan Texas Utilities, Denton Municipal Electric, Garland Power & Light, Google Energy, McDonald Electric Service, Texas A& M University and The Home Depot are expected to be the power offtakers from the project. For more details on Samson Solar Energy Center, buy the profile here.

How are Samson valves used in solar thermal power plants?

Valves engineered by SAMSON are used in many of these plants to control the processes that take place: automated linear and rotary valves are fitted in all plant sections and self-operated regulators are used in the power plant block. 3 Challenges Solar thermal power plants are vital to climate protection and sustainable energy generation.

Once completed, Samson II will generate enough clean electricity to power over 40,000 homes. The project is part of Invenergy's Samson Solar Energy Center, a five-phase, 1,310-MW development that ...

SAMSON supports you in planning new installations or overhauling and expanding existing plants. SAMSON assists you in selecting and configuring the right equipment to suit your control ...

The project is officially producing clean, reliable solar energy, and is being maintained by 24/7 operations & maintenance experts. The project owner will also perform post-construction ...

Samson Solar Energy Center Location DetailsSamson Solar Energy Center Make-UpDevelopment DetailsPower Purchase AgreementsContractors InvolvedSolar Power in The UsThe Samson solar energy generation facility will be developed in five phases of 250MW, 200MW, 250MW, 300MW, and 310MW capacities spread over Franklin, Lamar and Red River counties. The development work for all five phases is expected to be completed by Q3 2021 and the construction is scheduled for completion in Q3 2023. See more
