-----

With 8 kWh of stored energy and nearly 1,000W of real-world power in direct sun (and often 600-800W in less-than-ideal conditions), this is a seriously powerful system for just charging up ...

Designed for speed and efficiency, the Charge Qube can be rapidly deployed without the need for complex planning or infrastructure upgrades. Housed within a durable 10-foot sea container, it ...

These stations can be equipped with fast-charging infrastructure and battery storage to provide convenient charging solutions at events, construction sites, or temporary locations where the grid ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular design for easy ...

High-capacity lithium or lead-acid batteries store excess energy for nighttime or cloudy-day use. Inverters convert DC (direct current) electricity from solar panels into AC (alternating ...

Learn how battery buffers deploy fast-charging hubs anywhere (yes, highways & cities). Maxbo Solar's 2025 solutions inside. ? ...

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.
