Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

BigBattery provides lithium-ion battery packs that are perfect for powering any off-grid solar application. Browse our products today to find what you need.

Containerized Battery Energy Storage System (CBESS) is an important support for future power grid development, which can effectively improve the stability, reliability, and power quality of the power ...

Find exactly what you need in our extensive collection of lithium battery packs for solar containers, and narrow down your options by speaking with one of our experts!

Lithium battery storage can provide reduced grid power consumption during peak periods, thereby reducing electricity bills. In addition IQUPS can supply power continuity by instantly switching the ...

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

Folding PV arrays in the container -- capture sunlight efficiently, designed for quick deployment and durable outdoor operation. Lithium battery modules and a battery management system for energy ...

The energy storage system is essentially a straightforward plug-and-play system which consists of a lithium LiFePO4 battery pack, a lithium solar charge controller, and an inverter for the voltage ...
