Despite policy headwinds earlier in the year, energy storage additions in China and the US are set to continue growing this decade. The removal of storage mandates in China for ...

The source code associated with NEMS is now available via GitHub under an open-source license. In addition to changes to NEMS, we also ...

In homes, schools, hospitals, and shelters, solar and storage are delivering real cost savings and greater energy resilience to every corner of the country. Here are the top 25 solar and ...

The source code associated with NEMS is now available via GitHub under an open-source license. In addition to changes to NEMS, we also updated the way we calculate primary ...

In 2026, developers are likely to accelerate solar-plus-storage to serve hyperscaler demand, diversify revenue to manage volatility, and position early in long-duration and distributed storage for the next ...

The report notes a few key reasons why energy storage has become increasingly sought after. In the last year, storage prices have fallen 16 percent, setting a new all-time low. Driven by ...

Energy storage can provide multiple grid services. It can support grid stability, shift energy from times of peak production to peak consumption, and reduce peak demand. Solar-plus ...

Short-term storage that lasts just a few minutes will ensure a solar plant operates smoothly during output fluctuations due to passing clouds, while longer-term storage can help provide supply over days or ...
