Which solar inverter is right for your home?

SolarEdge is a fan favorite, and the Home Hub is their 2025 all-star. It's a string inverter, but here's the twist: each panel gets a power optimizer, boosting output like a microinverter without the full price tag. Available in 3.8 kW to 11.4 kW sizes, it's ready for small homes or big energy hogs.

What does a solar inverter do?

A solar inverter's main function is to switch DC power created by solar panels into AC power that's usable for your home appliances. They also collect and transmit valuable data to help you monitor the production and health of your solar system.

How much does a solar inverter cost?

The Enphase IQ8 is a top pick for its reliability, panel-level optimization, and 25-year warranty--especially great for shaded or complex roofs. Solar inverters cost between \$1,500 and \$5,000, depending on the type (string, micro, or hybrid) and your home's energy needs. Yes.

Which solar panel has a microinverter?

The Q.Tron AC module is actually a solar panel with a built-in microinverter. And, since we named it "Rookie of the Year" in our best solar panels for 2026 ranking, it should come as no surprise that we think they're the best new inverter on the block too. Q Cells is a well-established solar panel manufacturer.

Villas typically have larger roofs for solar panels, higher energy demands, and a desire for uninterrupted power supply. A hybrid inverter combines the functions of a traditional inverter, a charge controller, ...
