There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways (in order of prevalence): Solar PV is ...

We've gathered over 90 key solar energy statistics to show you exactly what's happening in this fast-growing sector. Our data comes from trusted sources. These include IEA, SEIA, Forbes, ...

Solar generation rose 23% in 2021, and the industry is expected to continue to grow over the next decade. Women hold 40% of full-time positions in the global solar workforce. Nearly 75% of...

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for heat and to ...

Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...
