Whether you're working to keep your battery bank charged or just to maximize your power production compared to your consumption on a grid-tied system, going with a wind turbine ...

Almost from the moment I bought it, I had the idea of putting up a wind turbine and making some electricity, and later adding some solar panels. This is the story of how I did it.

Yes, it is possible to build your own wind turbine. However, if you do not have a lot of electrical experience, we do not recommend it. Although the true definition of "DIY," relies heavily on ...

Fascinated by the idea of powering your off-grid cabin with wind energy? Discover the essential steps to building your own wind turbine now!

To make this homemade wind turbine, take one old washing machine motor and some PVC pipe, follow these easy instructions and start making your own off-grid power source.

Gather necessary tools and materials, then select an ideal location with strong, unobstructed wind flow. Construct a sturdy tower and assemble the turbine components, including ...

This guide provides a step-by-step guide on building affordable DIY solar panels and wind turbines, offering plans with a full materials list from home depot or local hardware stores.

In addition to solar panels, wind turbines can also be used to generate electricity. The wind turbine is connected to a stop switch, which sends the electricity produced by the wind turbine to the battery bank.
