---

To enhance green power transmission, the region is constructing six 10-million-kilowatt wind and photovoltaic power bases to supply clean energy to the Beijing-Tianjin-Hebei region and ...

An aerial drone photo taken on June 5, 2025 shows a photovoltaic project in Ulan Buh Desert, in Dengkou County of Bayannur, north China's Inner Mongolia Autonomous Region.

The Inner Mongolia autonomous region is leveraging its abundant wind and solar power potential to revolutionize its energy landscape, transforming itself into a hub for clean, sustainable ...

Launched in 1978, the Three-North program spans 13 provincial regions, with Inner Mongolia a major battleground. It aims to improve the environmental conditions in northern China ...

The Kubuqi model integrates solar power generation with agriculture and animal husbandry, using photovoltaic panels to provide canopies that help enhance plant survival and ...

Discover Inner Mongolia Energy Group's new 1.6 gigawatt solar farm, a landmark project that integrates thermal power for a more reliable and sustainable energy future.

Spanning approximately 7,347 acres, with a total investment of 6.973 billion RMB, the project adopts a comprehensive approach that combines large-scale solar power generation with ecological ...

Inner Mongolia, traditionally known for its coal resources, is rapidly repositioning itself as a clean energy hub. With expansive flatlands, intense solar radiation, and strong policy support, it is ...
