The large-scale development of photovoltaic power generation not only generates green electricity, adding new environmental value, but also provides an innovative approach to desert ...

A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in equipment and construction.

The project will convert solar energy into thermal power during the day, enabling stable power generation for up to eight hours during nighttime.

URUMQI -- A 1,000-megawatt power project combining solar thermal and photovoltaic power generation has been connected to the grid in Northwest China's Xinjiang Uygur autonomous ...

XINING, June 9 -- Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, ...

A Chinese state-owned company said on Monday it had connected ...

PVTIME - Recently, the Ruoqiang PV project, the largest single installed PV solar power plant in China, was connected to the national grid and ...

Each day, the transmission lines stretching over 3,000 km deliver electricity generated from Xinjiang's abundant wind and solar resources to east China's Anhui Province, where it is ...
